

JOB OFFER (FULL TIME)

FRONT-END DEVELOPER

JAVASCRIPT # ES6 # REACT # D3

WHO IS DIGEIZ ?

DiGEiZ develop a Deep Learning overlay for CCTV to analyse footfall. Our Deep Learning algorithms work real-time and make us compliant with GDPR. We deliver unique KPI at shop level, (counting, qualification and complete visitor patterns) through simple Business Intelligence dashboards.

TEAM

We are two sales, seven developers and growing. We love high performance programming, computer vision, deep learning and intuitive dashboards. If you live for clean & sharp code and you want to be part of something big, come and meet us!

 Type: Fulltime (CDI)

 Start: ASAP

 Location: Boulogne

 Salary: based on profile + stocks

YOUR MISSION

DiGEiZ AI bring real-time Mall Analytics. This is only made possible thanks to the incredible software made by our developer team. The software is autonomous in understanding and reporting footfall information. And regardless of the data quality, it is crucial to present the customer data in the most simple way.

Within the team, you will be responsible for designing, improving and scaling our web interface. You should master web development from prototyping (“fake it before make it”) to production through continuous testing, maintenance, performance measure and user tracking. You have a strong appetite for data visualisation and your motto is close to “Simplicity is the Ultimate Sophistication”. You will interact with our freelance designers, Front lead developer, CTO, CEO and our clients. You will have a lot of freedom to tell stories with the data.

YOUR RESPONSIBILITIES

- Collaborate with our team from planning to delivery
- Create clean, testable and well-documented code
- Tell beautiful and captivating stories with the data

YOUR STACK & QUALIFICATION

- Extensive experience in working on front-end applications with Javascript (ES6)
- Strong knowledge of React, Redux, Babel, and Webpack. D3.js and Redux-Saga are a plus.
- Knowledge of REST services
