

**JOB OFFER (FULL TIME)**

# DATA-STORYTELLER - FULL-STACK

# JAVASCRIPT # D3JS - C3JS

## WHO IS DIGEIZ ?

DiGEiZ brings Analytics to retailers and shopping centres, to let them enhance their customers' experience. DiGEiZ's comprehensive solution includes state of the art sensors, real time 3-D Deep Learning algorithms and Business Intelligence dashboards.

## TEAM

We are two sales, four developers and growing. We love high performance programming, computer vision, deep learning and intuitive dashboards. If you live for clean and sharp code, come and meet us!

Type: Fulltime (CDI)

Start: ASAP

Localisation: Boulogne

Salary: 45k-65k + stocks

## YOUR MISSION

DiGEiZ sensors bring real-time In-Store Analytics. This is only made possible thanks to the incredible software made by our developer team. The software is autonomous in understanding and reporting traffic information. And regardless of the data quality, it is crucial to present the customer data in the most comprehensive and simple way.

You will be responsible for designing, improving, and scaling our web interface. You should master web development from prototyping ("fake it before make it") to production through continuous testing, maintenance, performance measure and user tracking. You have a strong appetite for data visualisation and your motto is close to "Simplicity is the Ultimate Sophistication". You will directly interact with the CTO and CEO and have a lot of freedom to tell stories with the data.

## YOUR RESPONSIBILITIES

- Turn customer needs into mockups and prototypes
- Design the architecture to scale the interface
- Tell beautiful and captivating stories with the data

## YOUR STACK & QUALIFICATION

- Strong experience of Javascript + D3JS
- Experience with SQL databases
- Experience with Selenium or similar testing environment
